

JEREMY POWELL

Corvallis, OR, 97330 | 210-784-7022 | poweljer@oregonstate.edu

Website/Portfolio: <https://jimpowell-osu.github.io/portfolio/>

Graduating from Oregon State University in June 2026 with a BS in Environmental Sciences and a GIS Certificate. In pursuing the GIS Certificate, I've specialized in processing datasets including: multibeam sonar elevation data, satellite images, and raster-formatted climate data. I'm seeking a role where I can leverage my GIS expertise and expand on my passion for automating tedious workflows.

EDUCATION

B.S. Environmental Sciences (current)

Graduating June 2026

Oregon State University – Cumulative GPA: 3.63/4.0

Relevant Coursework: Quantitative Geospatial Analysis (R), Satellite Image Analysis (Google Earth Engine), Programming for Geospatial Analysis (Python), Principles of Remote Sensing, Cartography, Forest Surveying, Statistics with R, Calculus (through differential equations), Physics I and II, General Chemistry and General Biology Series, Field Methods in The Environmental Sciences, Botany.

EXPERIENCE

GIS Technician, Oceanography Research (Current)

June 2025 – Present

Dr. Jeff Beeson, Oregon State University

- Processed, visualized and generated bathymetry grids from point cloud data using Qimera and MB-System
- Generated difference grids of volcanically active seamounts using ArcGIS Pro
- Created script tools and used ArcGIS Model Builder to automate these GIS processes

Project: Multibeam Mapping of Monterey Canyon

April 20 – 29, 2026

Monterey Bay Aquarium Research Institute – Lead Scientist Charles Paull

- Maintained watch standards during multibeam acquisition (Kongsberg SIS 5)
- Actively performed QA/QC to maintain survey quality, and dynamically adjusted survey plans as necessary
- Cleaned data in real time using MB-System
- Deployed Expendable Bathythermographs to improve water column characterization

Intern, Landcover Monitoring

June 2024 – September 2024

Bureau of Land Management (Burns District, OR) / Northwest Youth Corps

- Conducted Field Monitoring: Pace180, ORMP (plant species cover), pasture utilization, stream temperature probes, and streamline shade monitoring.
- Navigated to field sites and collected data using Avenza Maps and ArcGIS Field Maps
- Certified in 4x4 driving with trailer and offroad vehicle operation (ROHVA).
- Full Time Internship – credited 520 hours through Americorps.

SKILLS & ABILITIES

GIS and Remote Sensing:

- Process, visualize and generate bathymetry grids from multibeam sonar point cloud data using MBARI's MB-System and QPS Qimera
- Develop automated geoprocessing workflows using ArcGIS Pro and Arcpy, and communicate results through ArcGIS Storymaps or static maps of high cartographic quality
- Leverage Google Earth Engine (JavaScript API) for algorithm-driven processing, classification and transformation
- Compute statistical and spatial analysis in R Studio (sp library)
- Data querying and analysis in Microsoft Excel (both VBA tools and nested cell formulas) and through SQL queries (often through Arcpy)
- Data exploration with Envi 6.0 Classic

Field Mapping Skills:

- Navigating remote areas, either on foot or in offroad vehicles
- Utilizing Survey123, Field Maps, Avenza Maps to collect field data: Pace180, ORMP, pasture utilization, photo point collection, water temperature probe deployment/recovery, streamline shade assessment (All through Bureau of Land Management)
- Plant identification, either from memory or using dichotomous keys (especially Hitchcock & Cronquist)

Certifications:

- Aware Driver 2.0™ GSA Fleet Course (Completed 07/2024)
- Utility trailer Towing & UTV Loading Training (BLM) (Valid through 07/2027)
- Recreational Off-Highway Vehicle Association Basic DriverCourseSM (Completed 07/2024)

GIS PROJECTS AND TINKERING

To see how I've applied GIS for school projects and personal passion projects, check out my website/portfolio at <https://jmpowell-osu.github.io/portfolio/>

VOLUNTEERING

Organic Growers Club, Oregon State University

Contributed ~50 hours to planting, weeding, and harvesting in a farm setting. Still participate weekly.

Chess Club, Oregon State University

Contributed to the egos of any player ranked 1300+ by losing to them. Still participate weekly.

McKenzie River Trust (Eugene, OR)

Contributed ~30 hours to blackberry removal, native species planting, and willow harvesting for habitat restoration.
